OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Yuma Proving Ground in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections. The MCX did not physically verify the existence of collections and, as such, the information contained in this report is based on background record reviews and information obtained via telephone interviews with the aforementioned installation personnel and institution professionals.

Archival research for Yuma Proving Ground began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Arizona State Historic Preservation Office in Phoenix, Arizona, at the Arizona State Museum in Tucson, Arizona, at the Directorate of Environmental Sciences, Yuma Proving Ground, and at the Bureau of Land Management, Yuma District Office in Yuma, Arizona. The records searches were performed in May, August, and December 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendices I-VIII), as well as a listing of the current tribal chairpersons (Appendix IX).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT YUMA PROVING GROUND, ARIZONA

From 1943 to 1950, the land that Yuma Proving Ground now occupies was owned by the U.S. Army Corps of Engineers. In 1951, the facility was reactivated as Yuma Test Station, a Class I installation under the Sixth U.S. Army, and in 1962 it was redesignated a Class II installation under the U.S. Army Materiel Command and the U.S. Test and Evaluation Command. In 1963, the installation was renamed Yuma Proving Ground.

This report covers archaeological work done since the inception of the Army installation in 1951; however, archaeological work on the land the post now occupies began in 1919. Archaeological investigations since 1951 have reportedly been conducted by the following institutions:

Archaeological Consulting Services, Tempe, Arizona,
Arizona Public Service Company, Phoenix, Arizona,
Brian F. Mooney Associates, San Diego, California,
Bureau of Land Management, Yuma District Office, Arizona,
Bureau of Reclamation, Yuma, Arizona
Complete Archaeological Services Association, Cortez, Colorado
Gutierrez-Palmenberg, Inc., Phoenix, Arizona,
Imperial Valley College, El Centro, California,
Marie Cottrell, Consulting Archaeologist,
Museum of Northern Arizona, Flagstaff, Arizona,
National Park Service, Santa Fe, New Mexico,
Northland Research, Inc., Flagstaff, Arizona,
San Diego Museum of Man, San Diego, California,
Soil Systems, Inc., Phoenix, Arizona,
Statistical Research, Inc., Tucson, Arizona,
SWCA, Inc., Environmental Consultants, Flagstaff, Arizona,
Wirth Associates, San Diego, California,
WESTEC Services, San Diego, California, and
Yuma Proving Ground, Arizona.

Only the investigations by the following institutions produced archaeological collections:

Brian F. Mooney and Associates,
Bureau of Land Management, Yuma District Office,
Gutierrez-Palmenberg, Inc.,
National Park Service,
Northland Research, Inc.,
San Diego Museum of Man,
WESTEC Services, and
Yuma Proving Ground.

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

The investigations by the San Diego Museum of Man spanned the years from 1919 to 1960. It is unclear whether the artifacts from the lands now occupied by Yuma Proving Ground were collected before or after the Army's activation of the post in 1951.

Current archaeological investigations by Gutierrez-Palmenberg involve documentation research, field survey, and selective excavation in order to complete a historic preservation plan for Yuma Proving Ground. The excavation was recently finished and the report is not yet available. Official archaeological site numbers had not been assigned by the Arizona State Museum at the time of the MCX's record search. The MCX has been informed by Valerie Morrill, Yuma Proving Ground Cultural Resource Manager, that only historic military debris was collected during the excavation (personal communication, 18 December 1996).

There are several site-numbering systems that have been applied to archaeological sites on Yuma Proving Ground. This investigation concentrated on sites that use the official Arizona State Museum numbering system. A site concordance table has been included in an Appendix (XIII) for reference regarding these numbering systems.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 40 boxes and 720 individual artifacts has been identified for Yuma Proving Ground. Artifacts recovered include prehistoric flaked stone tools, groundstone, ceramics, ornaments, animal bone, stone, and shell, as well as historic materials, such as metal, building materials, and ceramics.

As of the date of this report, these collections are reportedly located in the following repositories:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 prehistoric artifacts housed at the San Diego Museum of Man may have been collected by Malcolm Rogers from land now occupied by Yuma Proving Ground; however, these objects were collected from sites that have not been re-evaluated and it is unclear whether the sites are on Army land.

The attached *Summary of Current Locations of Archaeological Collections from Yuma Proving Ground* (Appendix X) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations conducted on the installation.

NAGPRA-Related Materials

No human remains or funerary objects were identified in a thorough review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

Land Issues for Yuma Proving Ground

A large parcel of land, including portions located on the Ligurta, Wellton, and Wellton Mesa Quadrangles, was transferred from Yuma Proving Ground to the Bureau of Land Management on 20 June 1981. The responsibility under NAGPRA for any collections made from these lands

is with the Bureau of Land Management (personal communication, Boma Johnson, Bureau of Land Management, Yuma District Office, 6 December 1996). Furthermore, some small parcels (~1 mile² each) in the southeastern and western portions of the installation have been withdrawn from the public domain. It is believed that no archaeological sites were affected by the transfer of these smaller land parcels (personal communication, Valerie Morrill, Yuma Proving Ground, 18 December 1996).

There are several small state-owned lands that are completely surrounded by Yuma Proving Ground. Yuma Proving Ground has assumed the responsibility for any archaeological work or materials from those lands due to the fact that it would not be feasible to treat them differently than the surrounding federal land (personal communication, Valerie Morrill, Yuma Proving Ground, 19 December 1996). The state lands within the installation total 5,000 acres compared with a total land area of 830,000 acres for the installation (*Ibid*).

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Two sets of references regarding archaeological work conducted on Yuma Proving Ground are attached: Appendix XI contains the list of references reviewed by the MCX during its archival research; and Appendix XII is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH YUMA PROVING GROUND

Few of the collections from Yuma Proving Ground have been definitively identified with a particular Native American tribe; however, archival research has determined there are tribes that are likely to be culturally affiliated with materials collected within the area occupied by the post. The Quechan (or Yuma) and the Yavapai have the strongest claim for the materials from Yuma Proving Ground according to ethnographic and historic accounts which state that the aboriginal territories of both tribes include the land occupied presently by Yuma Proving Ground. In addition, the Cocopah, Mohave, Maricopa, and Hopi may also have been in the area presently occupied by the installation in the past.

The Quechan tribe resided near the confluence of the Colorado and Gila Rivers in southwest Arizona in the area now occupied by Yuma Proving Ground at the time of first contact with Europeans in the 1500's and probably long before (Johnson 1992:145; Waldman 1988:259; Bee 1983:86; U.S.G.S. n.d.). Many of the artifacts from Yuma Proving Ground have been identified as belonging to the archaeological cultural pattern known as Patayan. According to Waldman (1985:18) and Cordell (1984:16), the Patayan complex is most likely ancestral to the Quechans, as well as other tribes in the area. The Quechans still reside on a portion of these ancestral lands (Bee 1983:86) on the Fort Yuma Indian Reservation in Arizona and California

(Bee 1994:524; Johnson 1992:145; Waldman 1988:259; Bee 1983:86; U.S.G.S. n.d.). Some Quechan may also reside on the Cocopah Indian Reservation near Somerton, Arizona because reportedly the Quechan may have co-occupied it along with the Cocopah (Waldman 1988:260).

The Yavapai have been adjudicated lands just east and north of Yuma Proving Ground (U.S.G.S. n.d.). It is believed that the Yavapai originated from the Sedona Red Rock area of Arizona, but ranged west to the Colorado River and as far south as the present city of Yuma. According to Khera and Mariela (1983:38) the Yavapai are believed to be descended from the peoples of the Hakataya archaeological tradition, as well as from the Prescott and Sinagua traditions. The records from sites on Yuma Proving Ground indicate that some of the artifacts from the post may be affiliated with the Hakatayan tradition. Others, however, believe the Yavapai to be descendant from the Patayan (Waldman 1985:18; Cordell 1984:16). From 1865 to approximately 1872, the Yavapai shared the Colorado River Indian Reservation with several other tribes, then moved to reservations established specifically for the Yavapai (Khera and Mariela 1983:38-41). They now occupy the San Carlos, Fort McDowell, and Camp Verde reservations along with other tribes (Johnson 1992:144; Waldman 1988:257; Khera and Mariela 1983:41-42). The Yavapai also have a separate reservation near Prescott, Arizona (Johnson 1992:144; Waldman 1988:257; U.S.G.S. n.d.).

The Cocopah (or Cocopah) resided in the lower Colorado River delta region in Baja California, Mexico when first contacted by Europeans in the mid-1500s (Williams 1983:99, 1994:120; Johnson 1992:145). Their ancestors probably migrated there from the Colorado and Gila River valleys around 1000 BC to 1 AD (Williams 1983:100, 1994:120), where they farmed the floodplain. The Cocopah and their Yuman/Hokan-speaking ancestors lived in the Colorado River region for over two thousand years (Williams 1994:120). The Cocopah are also believed to be descendant from the Patayan (Waldman 1985:18; Cordell 1984:16). The Cocopah now reside on the East and West Cocopah Reservations near Somerton in Yuma County, Arizona, approximately 30 miles south of Yuma Proving Ground (Williams 1983:102; 1994:120).

The Mohave have been adjudicated lands along the Colorado River, approximately fifty miles north of Yuma Proving Ground, from Bill Williams River north to Lake Mojave (U.S.G.S. n.d.). In aboriginal times they lived along both sides of the Colorado River (Butler 1994:356; Waldman 1988:143; Stewart 1983:55), as far south as present-day Blythe, California (Butler 1994:356) near the northwest border of Yuma Proving Ground. Their core territory in pre-contact times however was the Mojave Valley (Johnson 1992:144; Stewart 1983:55) far to the north of Yuma Proving Ground. Waldman (1985:18) and Cordell (1984:16) believe that the Mohave are descendant from the Patayan culture. Many Mohave now live on the following reservations: the Fort Mojave Reservation in Arizona (Butler 1994:355; Johnson 1992:144; Waldman 1988:143); the Colorado River Indian Reservation, near Parker, Arizona (Johnson 1992:144; Waldman 1988:143; Stewart 1983:55) and the Fort McDowell Reservation in Maricopa County, Arizona (Waldman 1988:144).

The Maricopa (or Pee-Posh) originally lived in the lower Colorado River valley, just south of the territory of the Mohave, but were pushed up the Gila River by other groups in the late seventeenth century (Booth and Cameron 1994:439; Johnson 1992:144; Harwell and Kelly 1983:73). By the mid-eighteenth century they reached the area that is now the Gila River Indian Community where they became confederated with the Pima (Booth and Cameron 1994:439). Today they reside on the Gila River and Salt River Indian Reservations which they share with the Pima (Booth and Cameron 1994:439; Johnson 1992:145; Harwell and Kelly 1983:75).

The Hopi are claiming all of the state of Arizona as their ancestral territory (personal communication, Lynne Teague, Arizona State Museum, 4 January 1996). Published Hopi migration myths (Nequatewa 1967:19-21) claim that different bands of ancestral Hopi took different migration routes to reach their present territory and consequently occupied much of Arizona sometime in the past (personal communication, Boma Johnson, Bureau of Land Management, Yuma District Office, 6 December 1995). This theory is supported by Waldman, who states that Hopi ancestors migrated from several locations to form the tribe (1988:95). Furthermore, Courlander surmises from Hopi traditions that some of the peoples that joined the tribe may have spoken Yuman languages (1982:xx). However, a literature review by the MCX failed to uncover any archaeological evidence from Yuma Proving Ground that suggests the Hopi or their Anasazi ancestors were in the area of present-day Yuma Proving Ground.

All of the tribes mentioned above are federally recognized, and no additional groups from these tribes are in the process of petitioning for federal recognition as of July 1995 (Bureau of Indian Affairs 1995:3).

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are draft NAGPRA Section 6 Summary letters (Appendix I-VIII) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix IX).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER TO THE QUECHAN OF FORT YUMA INDIAN RESERVATION FOR YUMA PROVING GROUND, ARIZONA

[Installation Header]

Mr. Mike Jackson, Sr., President
Quechan Tribal Council
P.O. Box 11352
Yuma, Arizona 85364

Dear Mr. Jackson:

I am writing to inform you of collections held by Yuma Proving Ground that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Quechan. Yuma Proving Ground has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Yuma Proving Ground is responsible for collections that total approximately 40 boxes of archaeological materials and an additional 720 individual artifacts housed at seven repositories. These repositories are:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 artifacts housed at the San Diego Museum of Man may have come from Yuma Proving Ground, however the specific locations of the associated archaeological sites have not been established and it is therefore unclear whether these objects are the responsibility of the installation.

The archaeological collections were generated from surveys and/or excavations conducted from 1951 to the present. The collections consist of prehistoric stone tools, ceramics,

ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. No funerary objects, sacred objects or human remains were identified in an examination of the site records, reports, or interviews with repository personnel.

We are notifying the Quechan Tribal Council because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally by the Quechan. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Yuma Proving Ground and the Quechan on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX II

DRAFT SECTION 6 SUMMARY LETTERS TO THE YAVAPAI FOR YUMA PROVING GROUND, ARIZONA

[Installation Header]

Mr. Stan Rice, President
Yavapai-Prescott Board of Directors
530 East Merritt Street
Prescott, Arizona 86301-2038

Dear Mr. Rice:

I am writing to inform you of collections held by Yuma Proving Ground that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Yavapai. Yuma Proving Ground has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Yuma Proving Ground is responsible for collections that total approximately 40 boxes of artifacts and approximately 720 individual artifacts housed at seven repositories. These repositories are:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 artifacts housed at the San Diego Museum of Man may have come from Yuma Proving Ground, however the specific locations of the associated archaeological sites have not been established and it is therefore unclear whether these objects are the responsibility of the installation.

The archaeological collections were generated from surveys and/or excavations conducted from 1951 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal

fragments, as well as associated documentation such as field notes, photographs, and correspondence. No funerary objects, sacred objects or human remains were identified in an examination of the site records, reports, or interviews with repository personnel.

We are notifying the Yavapai-Prescott tribe because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally by the Yavapai. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Yuma Proving Ground and the Yavapai on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

[Installation Header]

Mr. Theodore Smith, Sr., Chairman
Yavapai-Apache Community Council
P.O. Box 1188
Camp Verde, Arizona 86322

Dear Mr. Smith:

I am writing to inform you of collections held by Yuma Proving Ground that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Yavapai constituent of the Camp Verde reservation. Yuma Proving Ground has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Yuma Proving Ground is responsible for collections that total approximately 40 boxes of artifacts and approximately 720 individual artifacts housed at seven repositories. These repositories are:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 artifacts housed at the San Diego Museum of Man may have come from Yuma Proving Ground, however the specific locations of the associated archaeological sites have not been established and it is therefore unclear whether these objects are the responsibility of the installation.

The archaeological collections were generated from surveys and/or excavations conducted from 1951 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. No funerary objects, sacred objects or human remains were identified in an examination of the site records, reports, or interviews with repository personnel.

We are notifying the Yavapai-Apache Community Council because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally

by the Yavapai. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Yuma Proving Ground and the Yavapai on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

DRAFT SECTION 6 SUMMARY LETTER TO THE FORT MCDOWELL RESERVATION FOR YUMA PROVING GROUND, ARIZONA

[Installation Header]

Mr. Clinton Pattea, President
Mohave-Apache Community Council
(Fort McDowell) P.O. Box 17779
Fountain Hills, Arizona 85268

Dear Mr. Pattea:

I am writing to inform you of collections held by Yuma Proving Ground that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Yavapai and/or Mohave constituents of the Fort McDowell Reservation. Yuma Proving Ground has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Yuma Proving Ground is responsible for collections that total approximately 40 boxes of artifacts and approximately 720 individual artifacts housed at seven repositories. These repositories are:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 artifacts housed at the San Diego Museum of Man may have come from Yuma Proving Ground, however the specific locations of the associated archaeological sites have not been established and it is therefore unclear whether these objects are the responsibility of the installation.

The archaeological collections were generated from surveys and/or excavations

conducted from 1951 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. No funerary objects, sacred objects or human remains were identified in an examination of the site records, reports, or interviews with repository personnel.

We are notifying the Mohave-Apache Community Council because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally by the Yavapai and near the area thought to be part of the territory occupied or used aboriginally by the Mohave. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Yuma Proving Ground and the Yavapai and Mohave on these matters, please forward the name and method of contacting your tribal representative(s), traditional religious leader(s), or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

APPENDIX IV

DRAFT SECTION 6 SUMMARY LETTER TO THE COCOPAH FOR YUMA PROVING GROUND, ARIZONA

[Installation Header]

Mr. Peter Soto, Chairman
Cocopah Tribal Council
Bin G
Somerton, Arizona 85350

Dear Mr. Soto:

I am writing to inform you of collections held by Yuma Proving Ground that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Cocopah. Yuma Proving Ground has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Yuma Proving Ground is responsible for collections that total approximately 40 boxes of artifacts and approximately 720 individual artifacts housed at seven repositories. These repositories are:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 artifacts housed at the San Diego Museum of Man may have come from Yuma Proving Ground, however the specific locations of the associated archaeological sites have not been established and it is therefore unclear whether these objects are the responsibility of the installation.

The archaeological collections were generated from surveys and/or excavations conducted from 1951 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal

fragments, as well as associated documentation such as field notes, photographs, and correspondence. No funerary objects, sacred objects or human remains were identified in an examination of the site records, reports, or interviews with repository personnel.

We are notifying the Cocopah Tribal Council because some of these materials were found near the area thought to be part of the territory occupied or used aboriginally by the Cocopah. Additionally, Yuma Proving Ground is in the area believed to be part of the territory occupied or used aboriginally by the Quechan. Therefore we are also notifying you because it has been reported that there may be some members Quechan tribe residing on the Cocopah Reservation. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Yuma Proving Ground and the Cocopah on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

DRAFT SECTION 6 SUMMARY LETTER TO THE HOPI FOR YUMA PROVING GROUND, ARIZONA

[Installation Header]

Mr. Ferrell Secakuku, Chairman
Hopi Tribal Council
P.O. Box 123
Kykotsmovi, Arizona 86039

Dear Mr. Secakuku:

I am writing to inform you of collections held by Yuma Proving Ground that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Hopi. Yuma Proving Ground has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Yuma Proving Ground is responsible for collections that total approximately 40 boxes of artifacts and approximately 720 individual artifacts housed at seven repositories. These repositories are:

Arizona State Museum, Tucson, Arizona	~5 objects and 7 boxes of artifacts
Bureau of Land Management, Yuma, Arizona	~3-4 boxes of artifacts
National Park Service, Western Archaeological and Conservation Center, Tucson, Arizona	~9 artifacts
Northland Research, Inc., Flagstaff, Arizona	~5-6 boxes of artifacts
Ogden Environmental, San Diego, California	~3 boxes of artifacts
San Diego Museum of Man, San Diego, California	~20 boxes and ~376 individual artifacts
Yuma Proving Ground, Yuma, Arizona	~330 artifacts

An additional 14 artifacts housed at the San Diego Museum of Man may have come from Yuma Proving Ground, however the specific locations of the associated archaeological sites have not been established and it is therefore unclear whether these objects are the responsibility of the installation.

The archaeological collections were generated from surveys and/or excavations conducted from 1951 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal

fragments, as well as associated documentation such as field notes, photographs, and correspondence.

We are notifying the Hopi Tribal Council because some of these materials were found near the area thought to be part of the territory occupied or used aboriginally by the Hopi. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Yuma Proving Ground and the Hopi on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

APPENDIX X

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM YUMA PROVING GROUND, ARIZONA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

Repository	Repository POC	Telephone	Collection ID	Site Numbers	Fieldwork Dates

Artifacts	Prehistoric Elko Points, Stone, Lithics, Groundstone, Ceramics	Prehistoric, Archaic, Amargosa	Unknown	N/A	None

APPENDIX XI

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here.
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
